

Small Cell 5G Network Market- Global Industry Size, Share, Trends, Opportunities, and Forecast 2018-2028.

Segmented By Component (Solution, Services), By Radio Technology (Standalone and Non-Standalone), By Cell Type (Femtocells, Picocells and Microcells), By Frequency Band (Low Band, Mid Band and Millimeter Wave), By Application (Indoor Application and Outdoor Application), By End User (Residential, Commercial, Industrial, Smart City, Transportation & Logistics, Government & Defense, and Others), By Region, Competition

Report description:

The Small Cell 5G Network Market is anticipated to grow during the forecast period. The abruptly increasing demand for fast mobile data connectivity among consumers has increased the deployment of the next-generation 5G Radio Access Network (RAN). The rising installation of small cell 5G networks is growing across industrial, enterprise, and residential applications to provide enhanced coverage capacity at an affordable cost. Therefore, all these factors are expected to increase the growth of the small cell 5G network market during the forecast period.

Small Cell 5G are base stations that cater to a small segment of the macro site. In other words, small cells 5G are low-power, short-range, wireless transmission systems (base stations) covering a small geographical area or indoor/outdoor applications.

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

They are usually deployed in dense urban areas such as stadiums, malls, train stations, and areas with higher data capacity. Moreover, small cells play a significant role in efficiently delivering high-speed mobile broadband and other low-latency applications. Furthermore, small cells are broadly divided into three categories based on coverage area and the number of users they can support, including femtocells, picocells, and microcells.

Increasing Deployment of 5G Network

Globally, the rollout of 5G networks is accelerating, especially in industrialized nations like the United States, Germany, France, and the United Kingdom. The small cell 5G network industry benefits from the fast speeds and short latencies of 5G networks. The problem of clogged mobile traffic will only be resolved with the help of next-generation wireless networks. Governments all around the world have created supporting regulations to aid businesses in R&D and their pursuit of 5G commercialization. Due to its extremely fast data rates, increased capacity, and decreased latency, 5G technology is anticipated to be implemented in China for a wide range of life-changing applications, from 3D video to immersive media and audio quality. By 2025, China aims to have 576 million 5G connections, or about 40% of all 5G connections worldwide. Small cells are a perfect fit for the 5G revolution because they enhance data capacity while also helping service providers cut costs by doing away with pricey rooftop systems and installation expenses. The performance of mobile devices is further aided by the tiny cell 5G network, which effectively reduces the power consumption of smartphones and significantly lengthens their battery life.

Growing Adoption of Internet of Things (IoT) Applications

In many industries, the fast-evolving Internet of Things (IoT) will introduce new business models and processes. The proliferation of smartphones has changed telecom networks into data-centric networks in recent years. New commercial models connected to the Internet of Things (IoT) will create a shift in service delivery, network efficiency, and process agility. To support a variety of applications with varying requirements, the expansion of IoT will necessitate a lot of technology from a number of industries. To overcome these issues, networks should provide viable commercial models that cater to the needs of a diverse range of users with varying requirements and price points.

Rise in Mobile Data Traffic

Mobile data flow is the movement of internet material to different mobile consumer electronics, including smartphones and tablets. The market is expanding as a result of the global increase in mobile data traffic. By 2024, there will be 136 EB of monthly mobile traffic worldwide, representing a factor of 5 growth. A third of all mobile data traffic worldwide is anticipated to be carried by 5G networks by 2024. Thus, as a result of the noticeable increase in mobile data traffic, there will certainly be a significant surge in demand for technologically advanced telecommunication networks. The demand for network upgrades will rise as a result of the exponential rise in mobile data traffic, which is anticipated to drive the market for small cell 5G networks.

Market Segments

Small Cell 5G Network Market is segmented into by component, radio technology, cell type, by frequency band, application, end user, and by region. based on component, the market is segmented into solutions, and services. Based on radio technology, the market is segmented into standalone and non-standalone. Based on cell type, the market is segmented into femtocells, picocells, and microcells. Based on frequency band, the market is segmented into the low band, mid-band, and millimeter wave. Based on application, the market is segmented into indoor applications and outdoor applications. Based on end users, the market is segmented into a residential, commercial, industrial, smart city, transportation & logistics, government & defense, and others.

Market Players

Major market players in the Global Small Cell 5G Network Market are Huawei Technologies Co., Ltd., Samsung Electronics Co., Ltd., Nokia Corporation, Telefonaktiebolaget LM Ericsson, ZTE Corporation, Fujitsu Limited, CommScope Inc., Comba Telecom Systems Holdings Ltd., Altistar Networks India Private Limited, Airspan Networks Inc., Ceragon Networks Ltd., Corning Incorporated, Beijing Baicells Technologies Co Ltd.

Recent Developments

- In 2021, Nokia Corporation introduced a small cell 5G network, 'AirScale,' for premium outdoor and indoor 5G network coverage. Nokia Corporation's small cell 5G network products will have increased band frequency, capacity, and coverage in dense urban environments.

- Wireless Telecom Group, Inc. announced in July 2022 that a Network Listening Mode (NLM) software package had been released

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

under the CommAgility name to aid in the speedy and seamless deployment of 5G small cells. The new software streamlines the integration of NLM capabilities for 5G small cell manufacturers, enabling small cells to complete critical synchronization, network monitoring, and setup phases automatically. The NLM software provides a useful method for adding small cells to a network without wasting crucial time for reconfiguration, which reduces risk, accelerates time to market, and minimizes development costs.

Report Scope:

In this report, Global Small Cell 5G Network Market has been segmented into the following categories, in addition to the industry trends, which have also been detailed below:

-□Small Cell 5G Network Market, By Component:

- o□Solution

- o□Services

-□Small Cell 5G Network Market, By Radio Technology:

- o□Standalone

- o□Non-Standalone.

-□Small Cell 5G Network Market, By Cell Type:

- o□Femtocells

- o□Picocells

- o□Microcells

-□Small Cell 5G Network Market, By Frequency Band:

- o□Low Band

- o□Mid Band

- o□Millimeter Wave

-□Small Cell 5G Network Market, By Application:

- o□Indoor Application

- o□Outdoor Application

-□Small Cell 5G Network Market, By End User:

- o□Residential

- o□Commercial

- o□Industrial

- o□Smart City

- o□Transportation & Logistics

- o□Government & Defense

- o□Others

-□Small Cell 5G Network Market, By Region:

- o□North America

- United States

- Canada

- Mexico

- o□Europe

- U.K.

- Germany

- Italy

- France

- Spain

- Russia

- Turkey

- Rest of Europe

o Asia Pacific

- China

- India

- Japan

- South Korea

- Indonesia

- Thailand

- Philippines

- Malaysia

- Vietnam

- Rest of APAC

o South America

- Saudi Arabia

- UAE

- South Africa

- Egypt

- Nigeria

- Rest of South America

o Middle East & Africa

- Brazil

- Argentina

- Colombia

- Rest of MEA

Competitive Landscape

Company Profiles: Detailed analysis of the major companies present in Global Small Cell 5G Network Market.

Available Customizations:

Global Small Cell 5G Network Market with the given market data, Tech Sci Research offers customizations according to a company's specific needs. The following customization options are available for the report:

Company Information

- Detailed analysis and profiling of additional market players (up to five).

Table of Contents:

1. Product Overview

1.1. Market Definition

1.2. Scope of the Study

2. Research Methodology

2.1. Baseline Methodology

2.2. Methodology Followed for Calculation of Market Size

2.3. Methodology Followed for Calculation of Market Shares

2.4. Methodology Followed for Forecasting

3. Executive Summary

4. Impact of COVID-19 on Global Small Cell 5G Network Market

5. Voice of Customer

5.1. Brand Awareness

5.2. Factors Influencing Purchase Decision

5.3. Challenges Faced Post Purchase

6. Global Small Cell 5G Network Market Outlook

- 11.3.3.2.5. By End User
- 11.3.3.2.6. By Radio Technology
- 12. Market Dynamics
- 12.1. Drivers
- 12.1.1. Increasing in network densification
- 12.1.2. Rise in mobile traffic
- 12.1.3. Emergence of citizens broadband radio service (CBRS) band
- 12.2. Challenges
- 12.2.1. Concerns related to fiber backhaul
- 12.2.2. Small cell deployment challenges
- 13. Market Trends and Developments
- 13.1. Emergence of internet of things (IoT)
- 13.2. Increase in demand for ultra-reliable, low latency communications
- 13.3. Increasing investments in 5G infrastructure
- 13.4. Government support
- 13.5. Mergers & Acquisitions
- 14. Company Profiles
- 14.1. Huawei Technologies Co., Ltd.
- 14.1.1. Company Overview
- 14.1.2. Financials (If Available)
- 14.1.3. Product Portfolio
- 14.1.4. Key Personals
- 14.1.5. Recent Developments/Updates
- 14.2. Samsung Electronics Co. Ltd.
- 14.2.1. Company Overview
- 14.2.2. Financials (If Available)
- 14.2.3. Product Portfolio
- 14.2.4. Key Personals
- 14.2.5. Recent Developments/Updates
- 14.3. Nokia Corporation
- 14.3.1. Company Overview
- 14.3.2. Financials (If Available)
- 14.3.3. Product Portfolio
- 14.3.4. Key Personals

Small Cell 5G Network Market- Global Industry Size, Share, Trends, Opportunities, and Forecast 2018-2028.

Segmented By Component (Solution, Services), By Radio Technology (Standalone and Non-Standalone), By Cell Type (Femtocells, Picocells and Microcells), By Frequency Band (Low Band, Mid Band and Millimeter Wave), By Application (Indoor Application and Outdoor Application), By End User (Residential, Commercial, Industrial, Smart City, Transportation & Logistics, Government & Defense, and Others), By Region, Competition

Market Report | 2023-04-01 | 116 pages | TechSci Research

To place an Order with Scotts International:

- ☐ - Print this form
- ☐ - Complete the relevant blank fields and sign
- ☐ - Send as a scanned email to support@scotts-international.com

ORDER FORM:

Select license	License	Price
	Single User License	\$4900.00
	Multi-User License	\$5900.00
	Custom Research License	\$8900.00
		VAT
		Total

*Please circle the relevant license option. For any questions please contact support@scotts-international.com or 0048 603 394 346.

** VAT will be added at 23% for Polish based companies, individuals and EU based companies who are unable to provide a valid EU Vat Numbers.
