Report description:

KEY FINDINGS

The global dental sterilization market is forecasted to grow with a CAGR of 6.23% in terms of revenue during the forecast years 2022 to 2030. The market's notable growth is credited to key factors such as the dangers related to cross-transmission and infection, the increased need for cosmetic dentistry, as well as the high prevalence of dental diseases & disorders.

MARKET INSIGHTS

In dentistry, it is highly essential to have an efficient and effective way of controlling different infection types to ensure the patient's well-being. Moreover, sterilization and disinfection are crucial in terms of preventing the transmission of infectious pathogens to staff as well as patients.

The sterilization of dental devices is of prime importance across the medical field since thousands of patients die annually owing to improper sterilization and inadequate equipment hygiene. The method kills disease causing-microorganisms and eliminates transmissible agents, including spores and bacteria, using sterilants, like, chemicals, heat, and radiation, thereby minimizing the risk of exposure to life-threatening infections. In this regard, numerous infection control programs are also being launched. They play an essential role in raising awareness about the sterilization and cleaning of dental equipment and instruments, thus boosting the market's growth.

REGIONAL INSIGHTS

The global dental sterilization market growth assessment constitutes the evaluation of North America, Europe, Asia-Pacific, and the Rest of World. The Asia-Pacific is estimated to be the fastest-growing region during the forecast period. Key factors augmenting the market growth of the region include the mounting healthcare expenditure as well as the increasing focus on infection control in dental practices.

COMPETITIVE INSIGHTS

Multiple establishments are adopting technically advanced products and innovative technologies. Moreover, on account of the impact of the novel coronavirus pandemic, the demand for dental sterilization devices in the market has increased. As a result, the intensity of industrial rivalry is high. Some of the leading companies operating in the global market are Envista Holdings Corporation, W&H Group, Nakanishi Inc, etc.
