Global Surgical Scissors Market Report and Forecast 2023-2031

Global Surgical Scissors Market Outlook

The value of the global surgical scissors market was USD 368.77 million in 2022, driven by the rising demand of increasing number of surgical procedures, advancements in surgical techniques across the globe. The market is expected to grow at a CAGR of 3.50% during the forecast period of 2023-2031 to reach value of USD 502.59 million by 2031.

Surgical Scissors: Introduction

Surgical scissors are surgical instruments used for cutting tissues or sutures during surgical procedures. They are made up of two blades, which are usually made of stainless steel or other materials that can withstand sterilization. These blades are joined together at the pivot point and are operated by the handles located at the opposite end of the blades

Surgical scissors come in various shapes and sizes, with each designed for specific purposes. For instance, dissecting scissors have a fine tip and curved blades that are ideal for cutting delicate tissues, while blunt-nosed scissors are used for cutting sutures or dressings.

Surgical Scissors: Application and Uses

Surgical scissors are a type of surgical instrument that is used for cutting or dissecting tissues during surgical procedures. They are designed to have sharp blades and comfortable handles for precise cutting and ease of use. Surgical scissors come in a variety of shapes and sizes, each with its own specific purpose. Some of the common types of surgical scissors include:

- Operating scissors: These are the most commonly used type of surgical scissors and are used for cutting through soft tissues, such as skin and muscle.
- Mayo scissors: These are heavier and stronger than operating scissors, and are used for cutting through tough tissues, such as cartilage and fascia
- Metzenbaum scissors: These scissors have long, thin blades and are used for delicate dissection of soft tissues

- Bandage scissors: These scissors have blunt tips and are used for cutting through dressings and bandages without damaging the underlying skin.
- lris scissors: These are small, fine scissors used for ophthalmic and microsurgical procedures.

Surgical scissors are an essential tool in any surgical procedure and are used in various medical fields, including general surgery, plastic surgery, cardiovascular surgery, and neurosurgery. They are also used in veterinary medicine for surgical procedures on animals.

Global Surgical Scissors Market Scenario

The increasing number of surgical procedures, growing geriatric population, and rising demand for minimally invasive surgeries are some of the key factors driving the growth of the market. Based on material, the market is segmented into stainless steel, tungsten carbide, and others. Stainless steel accounted for the largest share in 2023 due to its cost-effectiveness and ease of availability. Based on application, the market is segmented into orthopaedic surgery, plastic surgery, neurosurgery, cardiovascular surgery, and others. Among these, orthopaedic surgery accounted for the largest share in 2021 due to the increasing prevalence of orthopaedic conditions and the growing demand for surgical procedures to treat these conditions. Based on end-user, the market is segmented into hospitals, ambulatory surgical centres, and others. Hospitals accounted for the largest share in 2021 due to the high volume of surgical procedures performed in hospital settings.

Geographically, the market is segmented into North America, Europe, Asia Pacific, Latin America, and Middle East and Africa. North America accounted for the largest share in 2023 due to the presence of a well-established healthcare infrastructure, high healthcare expenditure, and increasing adoption of minimally invasive surgical procedures

Overall, the global surgical scissors market is expected to continue to grow due to the increasing number of surgical procedures and the growing demand for minimally invasive surgeries.

Key Players in the Global Surgical Scissors Market

The report gives an in-depth analysis of the key players involved in the global surgical scissors market. The companies included in the market are as follows:

- -∏Arthrex. Inc.
- -∏B Braun Melsungen AG
- -∏KLS Martin Group
- Integra LifeSciences
- Thermo Fisher Scientific
- -□World Precision Instruments
- -□Scanlan International
- -□Stryker
- $\hbox{-}\square Purple \ Surgical \ International$
- Olympus Corporation
- -∏Teleflex Incorporated
- ¬Alcon Vision LLC
- -□Becton, Dickinson and Company
