United States of America (USA) Cereal Crops Market Summary, Competitive Analysis and Forecast to 2026

#### Summary

Cereal Crops in the United States industry profile provides top-line qualitative and quantitative summary information including: market size (value 2016-21, and forecast to 2026). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

#### Key Highlights

- The cereal crops sector consists of the production of maize, wheat, rice (paddy) & barley. The 'other' segment consists of other cereal crops such as sorghum, oats, millet, triticale, rye, mixed grain, buckwheat, canary seed and fonio. Production volumes are provided in tonnes and values are calculated at producer prices. All market data and forecasts are represented in nominal terms (i.e., without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2021 annual average exchange rates.
- The US cereal crops industry had total revenues of \$119.6 billion in 2021, representing a compound annual growth rate (CAGR) of 11.5% between 2016 and 2021.
- The Maize segment was the industry's most lucrative in 2021, with total revenues of \$94.2 billion, equivalent to 78.7% of the industry's overall value.
- Increasing consumption of wheat and maize in highly processed foods is leading to their increasing production. Also, the US government offers heavy subsidies for wheat and maize to influence its production which is supporting the cereal crops market across the country.
