- Enterprisewide Price \$7250.00

### **Report description:**

Mission Critical Communication Market Forecast to 2030

#### Market Overview

Mission-critical communications play a crucial role in making the world safer by enabling quick and reliable emergency response during a crisis. The goal of mission critical communications is to increase productivity, safety, and operational effectiveness by providing secure communication technologies with digital features that are specifically created for mission- and business-critical use. Business decision-making processes are accelerated and resource optimization is improved as a result. At locations where security and environmental protection standards are the strictest, mission-critical communications technology are essential. A company's various and mission-critical communication and collaboration requirements can be supported by adaptable and dependable mission-critical communications solutions. The seamless exchange of speech, video, and data among staff members speeds up teamwork and improves situational awareness.

One of the key elements anticipated to fuel the expansion of the global market for mission-critical communications is the rising usage of connected devices. The ability of mission essential communications systems to communicate in circumstances where regular and commercial communication networks are unavailable is also anticipated to propel the expansion of the mission critical communication market. Another factor that is anticipated to contribute to the expansion of the global mission critical communication market during the forecast period is the shifting customer preference from existing technology to LTE technology.

#### Segment Overview

Component, technology, end user, and geographical regions have all been used to segment the market for mission-critical communication. The global Mission critical communication market has been divided into solution, hardware, and services based on component. Additional hardware categories include distribution management systems, routers and gateways, and command and control. Additionally, services have been separated into consulting, integration, and maintenance categories. The Mission Critical Communication (mcx) market has been divided into LMR and LTE segments based on technology. LMR has also been separated into Analogue, TETRA, P25, and Others. The Mission Critical Communication market has been segregated into Energy and Utilities, Public Safety and Government Agencies, Transportation, Mining, and Other segments based on End User.

#### Regional Analysis

Europe, North America, the Middle East & Africa, Asia-Pacific, and South America are the five regions that make up the global Mission critical communication market. The market for mission-critical communications is dominated by North America. The region's main companies and existing infrastructure offer the regional market several prospects for significant expansion during

[www.scotts-international.com](http://www.scotts-international.com)

the research period. Due to the stringent government restrictions governing the design, production, and marketing of devices, Europe has recently seen tremendous growth. Industrialists and government officials in the region have a high level of concern for the safety of their employees, which has a substantial impact on the adoption of mission-critical communication in end-use sectors.

For contrast, Ericsson teams in China were on the ground assisting with mission-critical communications infrastructure and services as the corona virus spread in early 2018 to support medical services for affected populations. A high-speed, 5G mobile link was also built by Ericsson teams to assist the hospital's important function.

#### Major Players

Several of the key companies in the global market for mission-critical communications that have aided in the expansion of the industry. These companies include ZTE Corporation, Huawei Technologies Co. Ltd., Mentura Group Oy, Telstra (Australia), Leonardo SPA (Italy), Nokia (Finland), Telefonaktiebolaget LM Ericsson (Sweden), AT&T Inc. (US), L3Harris Technologies, Inc. (US), Cobham Wireless (UK), Hytera Communications Corp. Ltd. (China), Ascom (Switzerland), ZTE Corporation (China), Zenitel (US).  
COVID 19 Impacts

The telecommunications sector has seen significant technological developments in recent years, with mobile, broadband, and internet services rising in capabilities and global reach. The International Telecommunication Union (ITU) predicted that there were over 4 billion internet users worldwide at the end of 2019, with over 3 billion of those users living in developing countries. Many people and businesses continue to be cut off, despite improvements in internet and cell service access. Three billion people worldwide still lack internet connection. Out of a population of over 1 billion, only 294 million Africans have access to the internet. The telecom sector is therefore operating efficiently in comparison to other infrastructure sub-sectors. Because it is seen as a crucial service, the telecommunications sector has been exempted from important COVID-19-related limitations, such as stay-at-home directives and quarantine requirements, in contrast to many other industries. Some telecom companies have profited from the short-term increase in data traffic and increasing use of internet services as more people work from home and rely on video conferencing to schedule meetings. In reality, increased reliance on connections and digital services has coincided with an increase in traffic.

#### Table of Contents:

##### TABLE OF CONTENTS

##### 1 EXECUTIVE SUMMARY 19

##### 1.1 MARKET ATTRACTIVENESS ANALYSIS 21

##### 1.1.1 GLOBAL MISSION CRITICAL COMMUNICATION MARKET, BY COMPONENT 22

##### 1.1.2 GLOBAL MISSION CRITICAL COMMUNICATION MARKET, BY TECHNOLOGY 23

##### 1.1.3 GLOBAL MISSION CRITICAL COMMUNICATION MARKET, BY END USER 24

##### 1.2 GLOBAL MISSION CRITICAL COMMUNICATION MARKET, BY REGION 25

##### 2 MARKET INTRODUCTION 26

##### 2.1 DEFINITION 26

##### 2.2 SCOPE OF THE STUDY 26

##### 2.3 RESEARCH OBJECTIVE 26

2.4 MARKET STRUCTURE	27
3 RESEARCH METHODOLOGY	28
3.1 RESEARCH PROCESS	28
3.2 PRIMARY RESEARCH	29
3.3 SECONDARY RESEARCH	30
3.4 MARKET SIZE ESTIMATION	30
3.5 FORECAST MODEL	32
3.6 LIST OF ASSUMPTIONS	33
4 MARKET DYNAMICS	34
4.1 INTRODUCTION	34
4.2 DRIVERS	35
4.2.1 ADVANCE FEATURES OFFERED WITH MCX SYSTEMS AND NETWORK	35
4.2.2 INCREASING DEMAND OF RELIABLE NETWORK DURING EMERGENCIES	35
4.2.3 DRIVERS IMPACT ANALYSIS	36
4.3 RESTRAINTS	37
4.3.1 LIMITED SPECTRUM BANDWIDTH	37
4.3.2 RESTRAINTS IMPACT ANALYSIS	37
4.4 OPPORTUNITIES	38
4.4.1 NEED FOR RELIABLE AND HIGH-QUALITY PUBLIC SAFETY COMMUNICATION IN EMERGING ECONOMIES	38
4.4.2 GROWING BENEFITS OF 5G FOR MISSION CRITICAL COMMUNICATION SYSTEMS	38
4.4.3 SHIFT TOWARD MOBILE BROADBAND SOLUTIONS FOR PUBLIC SAFETY	38
4.5 CHALLENGES	39
4.5.1 TRANSFORMATION OF NETWORK WITHOUT INTERRUPTION OF THE ON-GOING SERVICES	39
