- Enterprisewide Price \$7250.00

Report description:

Door Intercom Market Forecast to 2030

Market Overview

A door intercom system is a standalone voice communication system that is often used privately within a small cluster of buildings. The door phone is another name for this device. A camera that is primarily mounted outside the entrance serves as the system's primary installation component. It is put in place at the entrance and departure points of businesses, organizations, and offices. Using a camera and sound, this technology facilitates communication between user and guest.

Segment Overview

Based on the type of product, the application, and the geography, the door intercom market has been segmented internationally. Based on the type of product, the Door Intercom Market has been segmented into two categories: Wi-Fi intercom systems and conventional intercom systems. Based on the application, the Door Intercom Market has been segmented globally into airports, schools, hospitals, workplaces, hotels, homes, and apartments, among many others.

Regional Analysis

The door intercom market has been segmented into North American, Asia-Pacific, European, Latin American, and the Middle East and Africa regions based on geographic location. The Asia-Pacific region, which has the greatest rate of economic growth, holds the majority of the global market share for door intercoms. The North American area holds the second-largest market share in the door intercom market as a result of the existence of numerous enormous significant key players, which generates more growth potential in this region. Additionally, the growing popularity of wireless intercom expands the region's potential for growth. The European region now holds the third-largest market share in the door intercom market due to the availability of a well-established wireless infrastructure system that allows consumers to switch to an audio-visual communication system. Another element driving market demand in this area is an increase in personal disposable income. Due to their lack of infrastructure, Latin America, the Middle East, and Africa collectively account for the smallest market share in the world market. Another issue limiting market expansion in these locations is the low per capita disposable income.

Major Players

Samsung Electronics Co., Ltd. (South Korea), COMMAX (South Korea), TCS AG (Germany), Fermax (Spain), ABB Group (Switzerland), Dahua Technology Co., Ltd. (China), Schneider Electric SE (France), Kocom Co., Ltd. (South Korea), Shenzhen Soben (China), Legrand SA (France), Fujian Aurine Technology Co., Ltd. (China), Panasonic Corporation (Japan), Guangd (Japan) are among the leading companies operating in the global Door Intercom market.

COVID 19 Impacts

A sizable portion of society has been impacted by the worldwide COVID 19 pandemic. Due to the global pandemic, the majority of individuals have lost their means of support. It has impacted various sectors' dynamics and growth. Due to the vaccine scarcity, everyone is worried about their immunity and practices social seclusion. Many offices have stopped building during lockdown conditions, which has caused a drop in sales revenue. Moreover, output was delayed as a result of the closure of industrial facilities. The margin of profit is reduced as a result of closing businesses, schools, and other structures.

However, it is anticipated that the door intercom market would recover from this global pandemic by the end of the third quarter of the following year by appropriately planning in accordance with the needs of the market.

Table of Contents:

TABLE OF CONTENTS

1	EXECUTIVE SUMMARY	25
2	MARKET INTRODUCTION	27
