### **Report description:**

After two years of pandemic-driven decline, in 2022 all deodorants categories except deodorant wipes returned to growth in both volume and current value terms, as consumers went back to their normal social lives, and also travelled more. Deodorant sprays experienced the strongest volume growth, and even stronger current value growth, due to rising cost inflation, and established players launching new innovative products while also revisiting existing ones, thus driving strong unit price growth.
