### **Report description:**

In 2022, though there was healthy growth in current value sales, constant value sales remained unchanged. The war in Ukraine had a negative impact, with the resultant energy crisis leading to soaring inflation and dampening sales somewhat. That being said, direct selling performed better than non-grocery retailing, as its competitive prices enabled it to maintain value sales. Health and beauty continued to account for most value sales, with sales for other products being negligible.
