Report description:

Sun care in Finland recorded positive current value growth overall in 2022, albeit at a substantially slower pace than in the previous year. This growth was partly driven by the ongoing recovery of sun protection and aftersun sales, which began to rebound in 2021 following the impact of the COVID-19 pandemic. By 2022, sales had finally returned to levels comparable to those seen in 2019. In terms of volume sales growth, overall sun care saw a slight decline in 2022.

Euromonitor International's Sun Care in Finland report offers a comprehensive guide to the size and shape of the market at a national level.
