Report description:

Market Overview:

The global peripheral artery disease market size reached US\$ 4.4 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 6.3 Billion by 2028, exhibiting a growth rate (CAGR) of 5.94% during 2023-2028.

Peripheral artery disease (PAD) is a cardiovascular disorder wherein constricted arteries restrict blood flow to the limbs. It results in hair loss, leg numbness, feet or toe sores, painful cramps in hips and thighs, coldness and weak pulse in legs, and erectile dysfunction among men. It is caused when a plaque, also known as atherosclerosis, develops in leg arteries that carry oxygen and nutrient-rich blood from the heart to the arms and legs. It is diagnosed using the ankle-brachial index, ultrasound scan, angiography, blood tests, doppler and ultrasound (duplex) imaging, computed tomographic angiography (CT), and magnetic resonance angiography (MRA).

Peripheral Artery Disease Market Trends:

At present, there is a rise in the geriatric population across the globe. This, along with changing lifestyles of individuals, increasing adoption of unhealthy dietary patterns, alcoholism, and obesity on account of lack of physical activities, represents one of the key factors driving the market. Moreover, there is an increase in the adoption of minimally invasive surgeries (MIS) due to less postoperative pain, fewer operative and major postoperative complications, shortened hospital stay, faster recovery times, and less stress on the immune system. This, coupled with the expanding healthcare industry, is propelling the growth of the market. In addition, governments of several countries are undertaking initiatives to spread awareness about the benefits of PAD devices, which is positively influencing the market. Besides this, the rising prevalence of cardiac diseases among individuals around the world is offering lucrative growth opportunities to industry investors. Furthermore, key market players are focusing on mergers and acquisitions (M&A) to strengthen PAD treatment capabilities. These players are also focusing on various developmental
