Report description:

The population of Brussels, the largest city in Belgium, is expected to continue growing, driven by net migration, good education and employment opportunities. Brussels is also set to remain the largest consumer market in Belgium, while Bruges records the highest disposable income per capita. However, challenges for the country's cities, including congestion, lack of affordable housing, pollution, and rising inequality in the case of poorly managed urbanisation will persist.

Euromonitor International's City Review reports analyse key trends and developments in 126 world's major cities. They provide localised city information in terms of economy, consumer lifestyles, housing and transport and city environment and offer valuable insights for strategic planning.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
