### **Report description:**

Romania's home and garden market saw double-digit current value growth in 2022 compared to the previous year, although this was largely driven by the country's double-digit inflation rate. This was caused by the energy crisis, stemming from the war in Ukraine. As a result, at constant 2022 prices, home and garden registered a decrease in constant value sales.

Euromonitor International's Home and Garden in Romania report offers a comprehensive guide to the size and shape of market demand at a national level. It provides the latest retail sales data (historic date range), allowing you to identify the categories driving growth. It also identifies the leading companies and their brands, and offers strategic analysis of key factors influencing demand - from new product developments, consumer lifestyles, route to market and pricing issues. Forecasts to 2027 illustrate how market demand is expected to evolve in the medium-term
