Report description:

The global portable printer market size reached US\$ 12.7 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 19.3 Billion by 2028, exhibiting a growth rate (CAGR) of 6.9% during 2023-2028.

Portable printers, also known as mobile printers, are compact and lightweight peripheral devices that can be connected via Bluetooth or a universal serial bus (USB). They are utilized by business travelers to revise documents and share them with clients. They are also used for printing bill receipts in petrol pumps, shops, credit card terminals, hotels and restaurants. Besides this, portable printers improve the productivity of the operations team and front-line workers by enabling them to generate invoices quickly. As a result, these printers find extensive applications in retail, healthcare, hospitality, manufacturing, e-commerce and logistics sectors around the world.

Portable Printer Market Trends:

At present, there is a rise in the penetration of the internet across the globe. This, along with the growing utilization of smart devices, such as tablets and smartphones, represents one of the key factors driving the market. Moreover, there is an increase in the need for mobile workforce management among numerous industries. This, coupled with the rising adoption of the bring your own device (BYOD) policy in different organizations to improve the productivity of employees, is propelling the growth of the market. In addition, organizations are focusing on innovating and modernizing their business worldwide. Besides this, the growing employment of printers for printing barcode and radio-frequency identification (RFID) labels are positively influencing the market. Furthermore, businesses are enhancing their customer experience to streamline documentation by issuing pick-up notices and delivery receipts at the point of delivery, which is catalyzing the demand for portable printers. Furthermore, key market players are focusing on research and development (R&D) activities for better battery runtime. These players are also extensively investing in building digital infrastructures, which is projected to bolster their overall sales and profitability.
