### **Report description:**

Ice cream retail volume growth is decelerating in 2023, after a period of dynamic growth in 2022. The rebound in tourism and return to foodservice channels were the main drivers of this strong performance in 2022. Players have continued to offer discounts and incentives to boost sales in 2023 through special promotions. Given the persistent price increases in ingredient and logistical costs, the category has performed well post-pandemic, with demand for ice cream remaining resilient.
