

**Immunohistochemistry Market - Global Industry Size, Share, Trends, Opportunity,  
and Forecast, 2018-2028F**  
**Segmented by Product (Antibodies, Equipment, Reagents, Kits), By Application  
(Diagnostics, Drug Testing, Forensic applications), By End User (Hospitals &  
Diagnostic Laboratories, Research Institutes, Others), By Region and By Competition**

Market Report | 2023-07-01 | 113 pages | TechSci Research

**AVAILABLE LICENSES:**

- Single User License \$4900.00
- Multi-User License \$5900.00
- Custom Research License \$8900.00

**Report description:**

Global Immunohistochemistry market is anticipated to witness impressive growth during the forecast period. This can be ascribed to the rising demand for the implementation of automation and machine learning in immunohistochemistry, along with the introduction of technologically advanced immunohistochemistry solutions across the globe. Moreover, the rise in product approvals and the launch of technologically advanced IHC systems for disease diagnosis are further driving the growth of the market during the forecast period. Similarly, growing research and development expenditures in the pharmaceutical and biotechnology industries are the major factors driving the growth of the market. Moreover, growing preference for personalized medicine, cancer genomics studies, and increasing patient engagement requirements is expected to drive the demand for the market during the forecast period. Similarly, the growing usage of antibodies in pathology, neuropathology, and hematopathology is expected to further enhance the demand for the immunohistochemistry market during the forecast period. In August 2021, the FDA approved Roche's VENTANA MMR RxDx Panel to identify dMMR solid tumor patients eligible for anti-PD-1 immunotherapy. Growing Prevalence of Chronic Diseases

The growing prevalence of cancer, along with the increasing geriatric population, is one of the major factors which is expected to further boost the growth of the market during the forecast period. As per the Joint Research Commission's report European Commission released in July 2020, it was estimated that in 2020 about 2.7 million (excluding non-melanoma cancer) new cancer cases would be diagnosed in the European Union, and breast cancer will be the most prevalent form of cancer with about 355,000

new cases in 2020. Moreover, the growing prevalence of chronic kidney disorders is expected to create lucrative growth during the forecast period. Furthermore, growing demand for analyzing tumors by identification of enzymes, tumor-specific antigens, tumor suppressor genes, oncogenes, and tumor cell proliferation markers is expected to enhance demand for the immunohistochemistry market during the forecast period. Moreover, the growing incidence of cardiovascular diseases, heart diseases, asthma, and chronic obstructive pulmonary diseases, along with the rising number of patient visits to hospitals, can enhance the demand for the immunohistochemistry market during the forecast period.

#### Growing Demand for Personalized Medicine

The growing demand for personalized medicine for non-small cell lung cancer patients enhanced the demand for immunohistochemistry during the forecast period. Moreover, this technique helps in making appropriate treatment decisions by performing the most complete and accurate histological subtyping of tumors possible, which can enhance the demand for the market over the years. Similarly, the growing availability of immunohistochemistry assays that can detect mutant proteins such as BRAF V600E and IDH1 R132H will further drive the market during the forecast period. It can provide a helpful replacement or adjunct for molecular testing. These techniques are highly reproducible, entail reasonable technical and interpretation complexity, and are also available at lesser costs. The growing development of multiplex and mutation-specific immunohistochemistry assays represents important innovations that are expected to further drive the growth of the market during the forecast period. According to research published in the Laboratory Investigation journal in July 2020, the immunohistochemical (IHC) and in situ hybridization (ISH) assays were utilized for detecting Covid-19 infection.

#### Market Segmentation

Global Immunohistochemistry market can be segmented on the basis of product, application, end-user, and by region. Based on the product, the market can be segmented into antibodies, equipment, reagents, and kits. On the basis of application, the market can be segmented into diagnostics, drug testing, and forensic applications. Based on end-user, the market can be further divided into hospitals & diagnostic laboratories, research institutes, and others. On the basis of region, North America dominated the market among Asia Pacific, Europe, Middle East & Africa, and South America. Among the different countries, the United States dominated the global immunohistochemistry market on account of the growing prevalence of chronic diseases in the country.

#### Recent Development

- In June 2022, Roche launched HPV self-sampling solution and expanded cervical cancer screening options.
- In February 2022, Moderna and Thermo Fisher Scientific announced a long-term strategic collaboration for manufacturing of Spikevax vaccine in the U.S. for diagnosis of COVID-19 and other investigational mRNA medicines in this pipeline.
- In February 2022, a new genetic analyzer brought advanced capabilities to sanger sequencing and fragment analysis, which is called capillary electrophoresis, and it enables sanger sequencing and fragment analysis, which is essential for improving clinical research and advancing scientific discovery.

#### Market Players

Thermo Fisher Scientific Inc., F.Hoffmann-La Roche Ltd., Merck KGaA., Danaher Corporation., Perkinelmer, Inc., Bio-Rad Laboratories, Inc., Cell Signaling Technology Inc., Bio SB., Agilent Technologies, Inc. are some of the leading players operating in the global Immunohistochemistry market.

#### Report Scope:

In this report, global Immunohistochemistry market has been segmented into the following categories, in addition to the industry trends, which have also been detailed below:

- Immunohistochemistry Market, By Product:
  - o□ Antibodies
  - o□ Equipment

**Scotts International. EU Vat number: PL 6772247784**

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

- o Reagents

- o Kits

- Immunohistochemistry Market, By Application:

- o Diagnostics

- o Drug Testing

- o Forensic applications

- Immunohistochemistry Market, By End User:

- o Hospitals & Diagnostic Laboratories

- o Research Institutes

- o Others

- Immunohistochemistry Market, By Region:

- o North America

- United States

- Canada

- Mexico

- o Europe

- France

- Germany

- United Kingdom

- Italy

- Spain

- o Asia Pacific

- China

- India

- Japan

- South Korea

- Australia

- o South America

- Brazil

- Argentina

- Colombia

- o Middle East & Africa

- South Africa

- Saudi Arabia

- UAE

Competitive Landscape

Company Profiles: Detailed analysis of the major companies present in the Global Immunohistochemistry Market.

Available Customizations:

With the given market data, TechSci Research offers customizations according to a company's specific needs. The following customization options are available for the report:

Company Information

- Detailed analysis and profiling of additional market players (up to five).

## Table of Contents:

1. Product Overview

1.1. Market Definition

1.2. Scope of the Market

**Scotts International. EU Vat number: PL 6772247784**

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

- 1.2.1. Markets Covered
- 1.2.2. Years Considered for Study
- 1.2.3. Key Market Segmentations
- 2. Research Methodology
  - 2.1. Objective of the Study
  - 2.2. Baseline Methodology
  - 2.3. Key Industry Partners
  - 2.4. Major Association and Secondary Sources
  - 2.5. Forecasting Methodology
  - 2.6. Data Triangulation & Validation
  - 2.7. Assumptions and Limitations
- 3. Executive Summary
  - 3.1. Overview of the Market
  - 3.2. Overview of Key Market Segmentations
  - 3.3. Overview of Key Market Players
  - 3.4. Overview of Key Regions/Countries
  - 3.5. Overview of Market Drivers, Challenges, Trends
- 4. Voice of Customer
- 5. Global Immunohistochemistry Market Outlook
  - 5.1. Market Size & Forecast
    - 5.1.1. By Value
  - 5.2. Market Share & Forecast
    - 5.2.1. By Product (Antibodies, Equipment, Reagents, Kits)
    - 5.2.2. By Application (Diagnostics, Drug Testing, Forensic applications)
    - 5.2.3. By End User (Hospitals & Diagnostic Laboratories, Research Institutes, Others)
    - 5.2.4. By Region (North America, Europe, Asia Pacific, South America, Middle East & Africa)
    - 5.2.5. By Company (2022)
  - 5.3. Market Map
    - 5.3.1 By Product
    - 5.3.2 By Application
    - 5.3.3 By End User
    - 5.3.4 By Region
- 6. North America Immunohistochemistry Market Outlook
  - 6.1. Market Size & Forecast
    - 6.1.1. By Value
  - 6.2. Market Share & Forecast
    - 6.2.1. By Product (Antibodies, Equipment, Reagents, Kits)
    - 6.2.2. By Application (Diagnostics, Drug Testing, Forensic applications)
    - 6.2.3. By End User (Hospitals & Diagnostic Laboratories, Research Institutes, Others)
    - 6.2.4. By Country
  - 6.3. North America: Country Analysis
    - 6.3.1. United States Immunohistochemistry Market Outlook
      - 6.3.1.1. Market Size & Forecast
        - 6.3.1.1.1. By Value
      - 6.3.1.2. Market Share & Forecast
        - 6.3.1.2.1. By Product
        - 6.3.1.2.2. By Application
