Report description:

Description

Report Scope:

This report provides an overview of the global market for edge security and analyzes market trends. Using 2022 as the base year, this report provides estimated market data for the forecast period 2023 through 2028. Revenue forecasts for this period are segmented based on component (solutions and services), deployment, organization size, vertical and region.

This report also focuses on the main trends and challenges that affect the market and the competitive landscape. It explains the current market trends and provides detailed profiles of the main players and strategies to enhance market presence. This report estimates the size of the global edge security market in 2022 and provides projections of the expected market size through 2028.

Report Includes:

- 40 data tables and 39 additional tables
- An up-to-date overview and analysis of the global market for edge security technologies and services
- Analyses of the global market trends, with market revenue data (sales figures) for 2022, estimates for 2023, forecasts for 2024 and 2026, and projections of compound annual growth rates (CAGRs) through 2028
- Highlights of emerging technology trends, opportunities and gaps estimating current and future demand for edge security market software, products, and solutions, and identification of the major regions and countries involved in the market developments
- Estimation of the actual market size and revenue forecast for the global edge security market in USD million values, and their corresponding market share analysis based on component, deployment type, organization size, vertical sector, and region
- Updated information on the recent market dynamics, industry shifts and regulations, and other macroeconomic variables that

will shape and influence this market in the coming years (2023-2028)

- Discussion of value chain analysis in the edge security market providing a systematic study of key intermediaries involved, with emphasis on products, technologies/solutions and applications
- Information on ESG-related case studies and a brief general overview of the steps taken towards the ESG sustainability, ESG practices by companies, and current status of ESG in the edge security market
- A relevant patent analysis of edge security market with significant allotments of recently granted patents
- A look at the major growth strategies adopted by leading players operating in the market, along with their recent developments, strategic alliances, and competitive benchmarking
- Identification of the major stakeholders and analysis of the competitive landscape based on recent developments, and segmental revenues
- Descriptive company profiles of the leading global players, including Cisco Systems Inc., Broadcom Inc., Palo Alto Networks Inc., Fortinet Inc., and Check Point Software Technologies Ltd.

Executive Summary

Summary:

Edge security refers to the security measures and solutions implemented at the edge of a network, where the network connects to external networks, such as the internet. Edge security protects networks and devices from cyberattacks, data breaches and other security threats. The increasing number of security breaches and cyberattacks, the growing adoption of cloud computing and the proliferation of the Internet of Things (IoT) drive the edge security market. As more devices and networks connect, the need for robust security measures at the network's edge becomes increasingly essential. Components of edge security solutions may include firewalls, intrusion detection and prevention systems, virtual private networks (VPNs) and content filtering.

Edge security adds a layer of complication to organizations by enabling diverse stakeholders to maintain IT infrastructures, software development, networking, traffic distribution and service management. Edge also combines software, hardware solutions and networking architecture to cover various business use cases. The impact of the COVID-19 outbreak boosted the use of data centers and edge computing. As more of these technologies are adopted, investment will likely fall considerably in the months ahead. Businesses across many industry verticals are decreasing expenditures in enhancing servers and software. There are a few outliers: rising edge and IoT spending in the IT/telecom and healthcare industries.

This report segments the global edge security market by component (solutions and services), deployment, organization size, vertical and region.

Table of Contents:

Table of Contents

Chapter 1 Introduction

Overview

Study Goals and Objectives

Scope of Report

Research Methodology

Information Sources

Geographic Breakdown

Chapter 2 Executive Summary and Highlights

Market Outlook

Executive Summary

Chapter 3 Industry Outlook

Scotts International. EU Vat number: PL 6772247784

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

Market Overview
Value Chain Analysis
Hardware Vendors
Network Service Providers
Cloud Service Providers
Edge Security Solution Vendors
End Users
Porter's Five Forces Analysis
Market Growth Potential Analysis
Russia/Ukraine War Impact on the Market
Impact of COVID-19 on the Market
Chapter 4 Market Dynamics
Overview
Market Drivers
Growing Digital Transformation
Increasing Use of 5G
Need for Secure Access
Market Challenges
Lack of Awareness
Managing a Highly Distributed Environment
Market Opportunities
Growing Threat of Data Breaches
Rising Adoption of IoT Devices
Chapter 5 Market Breakdown by Component
Overview
Solution
Software-defined Wide Area Network (SD-WAN)
Secure Web Gateway (SWG)
Zero-Trust Network Access (ZTNA)
Cloud-Access Security Broker (CASB)
Others
Services
Managed Services
Professional Services
Chapter 6 Market Breakdown by Deployment
Overview
Cloud
On-premise
Chapter 7 Market Breakdown by Organization Size
Overview
Large Enterprises
Small and Medium Enterprises
Chapter 8 Market Breakdown by Vertical
Overview
BFSI
Retail
Healthcare

tel. 0048 603 394 346 e-mail: support@scotts-international.com

www.scotts-international.com

Manufacturing
IT/Telecom
Other Verticals
Government
E-Commerce
Defense
Chapter 9 Market Breakdown by Region
Overview
North America
The U.S.
Canada
Mexico
Europe
The U.K.
Germany
Asia-Pacific
China
India
Japan
Latin America
Brazil
Middle East and Africa
Chapter 10 Sustainability in Edge Security Market: An ESG Perspective
Key ESG Issues in the Edge Security Market
Carbon Footprint/Environmental Impact
Animal Welfare
Labor Practices
Transparency and Governance
Edge Security Market ESG performance Analysis
Environmental Performance
Social Performance
Governance Performance
Current Status of ESG in the Edge Security Market
Consumer Attitudes
ESG Practices in the Edge Security Market
Case Study
Environmental Initiatives
Social Initiatives
Governance Initiatives
Outcomes
Investments
Concluding Remarks from BCC
Chapter 11 Emerging Technologies and Developments
Overview
Current Market Trends
Emerging Technologies in the Edge Security Market
New Technology Development

Chapter 12 Patent Analysis
Overview
Patents Granted (2019-2023)
Recently Granted Patents
Chapter 13 M&A and Venture Funding Outlook
Merger and Acquisition (M&A) Analysis
Startup Funding in the Edge Security Market
Chapter 14 Competitive Landscape
Vendor Landscape
Market Ranking Analysis
Competitive Scenario
Chapter 15 Company Profiles
AKamai Technologies
Amazon Web Services Inc.
Barracuda Networks Inc.
Broadcom Inc.
Check Point Software Technologies Ltd.
Cisco Systems Inc.
Cloudflare Inc.
F5 Inc.
Forcepoint
Juniper Networks Inc.
Palo Alto Networks
Perimeter 81 Ltd.
Skyhigh Security
Versa Networks Inc.
Zscaler Inc.
