Indonesia Software Market Summary, Competitive Analysis and Forecast to 2027

Summary

Software in Indonesia industry profile provides top-line qualitative and quantitative summary information including: market size (value 2017-22, and forecast to 2027). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

- The software market is defined as revenues generated from both: sales of, and subscriptions to, various software packages and offerings. The market includes both signed deals that remain under contract, and the annual revenues associated with new contracts signed, within a particular calendar year. This excludes sales opportunities for third-party services providers.
- Indonesia's digital economy is primarily driven by e-commerce. The government wants to position the country as a digital hub in Southeast Asia in line with this rapid growth. It intends to do this by increasing investment in digital infrastructure, such as by constructing data centers and hiring digital talent.
