Report description:

Imaging devices are expected to register further volume decline in 2023. Continuing advances in smartphones cameras leading are leading to continual decline in imaging devices, to the extent that some smartphones can meet the imaging device needs of many households and therefore, consumers do not perceive the need to purchase a separate imaging device. This is also aligned with the broader rejection trend of task-specific consumer electronics. Consumer preference is for versatile, multifunctiona...

Euromonitor International's Imaging Devices in Greece report offers a comprehensive guide to the size and shape of the in-home, portable and in-car consumer electronics products markets at a national level. It provides the latest retail sales data, allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, distribution or pricing issues. Forecasts illustrate how the market is set to change.
