- Multiple User License (Global) €2475.00

Report description:

Wearable electronics experienced modest growth in retail volume terms in 2023. Demand continued to be impacted by a high rate of inflation, at least during the first half of the year, which led to more guarded discretionary spending. Continuing the established trend of the rest of the review period, smart wearables were the key driver of growth, as consumers opted for the greater number of functions associated with these gadgets. Such products also benefitted from their connectivity with other c...

Euromonitor International's Wearable Electronics in Canada report offers a comprehensive guide to the size and shape of the in-home, portable and in-car consumer electronics products markets at a national level. It provides the latest retail sales data, allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, distribution or pricing issues. Forecasts illustrate how the market is set to change.
