- Multiple User License (1 Site) €1650.00
- Multiple User License (Global) €2475.00

Report description:

In 2023, wearable electronics demonstrated positive volume growth albeit at a lower rate than was achieved in the previous year. The economic crisis in the country, along with the major earthquake that hit the country in February 2023, were the main reasons for weaker volume growth. Nonetheless, growing interest in high-tech products and the desire for connectivity is driving volume sales of wearable electronics.

Euromonitor International's Wearable Electronics in Turkey report offers a comprehensive guide to the size and shape of the in-home, portable and in-car consumer electronics products markets at a national level. It provides the latest retail sales data, allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, distribution or pricing issues. Forecasts illustrate how the market is set to change.

Product coverage: Activity Wearables, Smart Wearables.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

- * Get a detailed picture of the Wearable Electronics market;
- * Pinpoint growth sectors and identify factors driving change;
- * Understand the competitive environment, the market's major players and leading brands;
- * Use five-year forecasts to assess how the market is predicted to develop.

Euromonitor International has over 40 years' experience of publishing market research reports, business reference books and online information systems.
