Report description:

KEY FINDINGS

The Europe disposable patient positioning products market growth is anticipated to progress at a CAGR of 3.10% during the forecast period, 2023-2032. Facts such as the increased demand for surgeries, the rising geriatric population, and the growing cases of chronic diseases are accredited to the region's market growth.

MARKET INSIGHTS

Poland, Spain, Italy, Germany, the United Kingdom, France, Belgium, and Rest of Europe are assessed for the Europe disposable patient positioning products market growth evaluation. France's healthcare system is well-established and possesses one of the best public healthcare globally. The country's healthcare system comprises a fully-integrated network of public hospitals, doctors, private hospitals, as well as various other medical service providers. Besides, it is an international service offering healthcare for every citizen, irrespective of their age, wealth, and social status.

Conversely, Italy's national health plan provides universal coverage for medical and hospital benefits. However, nearly 30% have secured additional private health insurance. The country's public healthcare system is decentralized and is characterized on the basis of three levels, namely, the state, region, and local health boards. For instance, the state plays a crucial role in issuing general system guidelines, managing international relations, establishing work contracts, and funding research hospitals. Moreover, Italy also has one of the highest uptakes of plastic surgery worldwide, with breast and eyelid surgery being primarily popular. Therefore, such factors are expected to fuel Europe's disposable patient positioning products market growth during the forecast period.
