Report description:

KEY FINDINGS

The South Korea disposable patient positioning products market growth is anticipated to progress at a CAGR of 4.18% during the forecast period, 2023-2030. Favorable laws and regulations of South Korea thoroughly supplement its resilient healthcare system.

MARKET INSIGHTS

The rise in healthcare requirements, advancements in surgical techniques, and improved accessibility to healthcare services have collectively contributed to a notable increase in the number of surgical procedures performed in South Korea. Among the essential medical supplies, disposable positioning solutions have experienced a surge in demand due to their pivotal role in ensuring patient safety and maintaining proper positioning during these procedures.

According to sources, the geriatric population in South Korea surpassed 9 million in 2022, and this number is projected to reach 10 million by 2023, with a growth rate of 5.4%. As the elderly population continues to expand, there is a corresponding surge in demand for healthcare services, including surgical interventions. The significance of disposable positioning products in preserving patient safety and comfort during these procedures has consequently led to an increased demand for these products in the market.

Further, the South Korea disposable patient positioning products market scope includes product, application, and end-user. The product segment includes securing devices, cushions, headrests/holders, heel/elbow protectors, table pads, arm cradles, and other products.
