Report description:

Volume sales in wearable electronics are on the marginally-positive side of flat in 2023, which is slightly lower than the volume sales seen in 2022. The main trends in the category are connected to the shift from activity wearables to the greater functionality offered by smart wearables. This shift to smart wearables is helped by the greater availability of smart wearables across a broader spectrum of pricing points - making the pricing of smart wearables more accessible to a wider consumer aud...

Euromonitor International's Wearable Electronics in Denmark report offers a comprehensive guide to the size and shape of the in-home, portable and in-car consumer electronics products markets at a national level. It provides the latest retail sales data, allowing you to identify the sectors driving growth. It identifies the leading companies, the leading brands and offers strategic analysis of key factors influencing the market- be they new product developments, distribution or pricing issues. Forecasts illustrate how the market is set to change.

Product coverage: Activity Wearables, Smart Wearables.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.

Why buy this report?

- * Get a detailed picture of the Wearable Electronics market;
- * Pinpoint growth sectors and identify factors driving change;
- * Understand the competitive environment, the market's major players and leading brands;
- * Use five-year forecasts to assess how the market is predicted to develop.

Euromonitor International has over 40 years' experience of publishing market research reports, business reference books and online information systems.
