### **Report description:**

Market Overview:

The UAE smart lighting market size reached US\$ 61.9 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 209.2 Million by 2028, exhibiting a growth rate (CAGR) of 21.6% during 2023-2028.

Smart lighting system represents an energy-efficient and inexpensive lighting system that enables the consumer to remotely adjust ambient lighting of a particular space. Smart-lighting products have numerous applications in industrial, commercial, and residential sectors. It can be controlled through a smartphone-controlled wall keypad, a touchscreen panel or through voice commands. This significantly increases the convenience of the user, as smart lights can be switched on/off from anywhere in the world at any point of time. Smart lights are also equipped with adaptive dimmers that can imitate sunshine and gradually reduce ambient light as the sun goes down. Additionally, smart lights are able to provide a higher sense of security to users who are not present in their homes with a feature to turn on/off the house lights according to their choice, giving an impression that the house is occupied. Smart lights also simplifies user experience through interactive controls and buttons on keypad and on smartphone applications.

Consistent growth in the UAE's infrastructure and real estate sector is one of the key drivers for the UAE smart lighting market. Moreover, the government is also playing a big role in the adoption of smart lighting technology. According to the UAE Vision Plan 2021, the government aims to adopt smart lighting products for all major airports, roads, ports and infrastructures. Additionally, UAE has installed smart lighting systems over large stretches of city streets and has upgraded lighting equipment in the shopping centres, retail establishments, digital billboards and other commercial projects. These energy-efficient replacements will continue throughout the country and the upcoming projects will adhere to the government's regulations for energy saving smart lighting systems. Moreover, Dubai plans to modify a significant percentage of its outdoor lighting systems including roads, streets, and parks with smart LED bulbs in the coming years.

#### Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the UAE smart lighting market report, along with forecasts for the period 2023-2028. Our report has categorized the market based on offering, communication technology, installation type, light source and application.

#### Breakup by Offering:

- Hardware
  - Lights and Luminaires
  - Lighting Controls
- Software
- Services
- Design and Engineering
- Installation
- Post-Installation

#### Breakup by Communication Technology:

- Wired Technology
- Wireless Technology

#### Breakup by Installation Type:

- New Installation
- Retrofit Installation

#### Breakup by Light Source:

- LED Lamps
- Fluorescent Lamps
- Compact Fluorescent Lamps
- High Intensity Discharge Lamps
- Others

#### Breakup by Application:

- Commercial
- Residential
- Public Infrastructure
- Others

#### Value Chain Analysis

#### Key Drivers and Challenges

#### Porters Five Forces Analysis
