Report description:

Market Overview:

The Indian access control market size reached INR 63.2 Billion in 2022. Looking forward, IMARC Group expects the market to reach INR 144.3 Billion by 2028, exhibiting a growth rate (CAGR) of 14.62% during 2023-2028.

Access control system recognizes, authenticates, and authorizes the entry and exit of an authorized person into the premises ensuring complete security. The access control systems can either use biometric or proximity/smart cards. Owing to the rising security concerns, along with the increasing crime rates in India, these devices are majorly deployed in data centers, offices, hotels, retail stores, entertainment stores, government institutions, banks, etc.

Several factors, such as the rapid installation of access control systems across commercial and defense sectors, are currently bolstering the market growth in India. Various private and government entities are investing in enhanced security systems for data protection and providing a safer and secure environment for their employees. The urbanized regions of the country, such as Hyderabad, Chennai, Bangalore, Delhi-NCR, Mumbai, etc. have made impressive progress in advancing their security systems, pertaining to government buildings, IT hubs and commercial spaces. Moreover, the introduction of technologically advanced, contactless smart cards for diversified applications, further catalyzes the product demand, based on their user-friendly and seamless experience. Apart from this, due to the escalating crime incidents in the country, various commercial premises such as IT companies, enterprises, data centers, etc. are installing access control systems to protect personnel and data breaches as well as for recording employees' entry and exit timings.
