Report description:

Market Overview 2023-2028:

The North America ink market size reached US\$ 7.2 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 8.7 Billion by 2028, exhibiting a growth rate (CAGR) of 3.2% during 2023-2028.

Ink has been around for centuries and it plays an important role in different aspects of human life. It is available in the form of a liquid or a paste and is primarily produced from materials like solvents, dyes, pigments, resins, lubricants, solubilizers, fluoreseents and surfactants. It can be divided into two categories which include printing and writing ink. Over the past few years, printing ink has witnessed a higher growth owing to its utilized in printing books, posters magazines, newspapers, calendars, journals and photographs.

The ink market in North America is currently being driven by several factors. Owing to the hectic lifestyles of consumers and an increase in the on-the-go food consumption habits, there is a rise in the demand for single-serve ready-to-eat food products. This, in turn, is resulting in the expanding application of ink in the packaging industry. Further, the rising consumer awareness about bio-based ink, produced from algae cells and other plant materials, is expected to spur the demand for ink in the upcoming years.
