### **Report description:**

Market Overview:

The North America digital camera market size reached US\$ 3.9 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 8.3 Billion by 2028, exhibiting a growth rate (CAGR) of 13.2% during 2023-2028.

Digital cameras, also known as digicams, capture photographs digitally which can be stored in a computer and displayed on a screen. As they use charged coupled device (CCD) to capture images, these cameras eliminate the process of developing a film roll. Owing to this, they are user-friendly and economical for the consumers. Digital cameras also offer a variety of other functions such as auto-focus, removable memory card, shutter priority, best-shot selector, panorama assist, etc.

North America digital camera market is currently being driven by several factors. Rising popularity among consumers owing to its capability of delivering high-quality photographs has catalyzed the demand in the region. Moreover, growing interests in wildlife, fashion and wedding photography have induced the growth of the digital camera market. Additionally, advanced features such as DSLR with HD video and picture quality has created an attractive market for the consumers. Furthermore, easy availability of compatible digital cameras, with changeable lens, has also catalyzed the demand in the region. Apart from this, the rising per capita incomes have increased the affordability of digital cameras, thus escalating the market growth in the region. Rising consumer awareness towards various technological innovations such as anti-shake technology, face recognition and pre-set modes have also stimulated the demand for digital cameras in the region.
