Report description:

Market Overview:

The North America fire extinguisher market size reached US\$ 1.5 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 1.9 Billion by 2028, exhibiting a growth rate (CAGR) of 3.2% during 2023-2028.

A fire extinguisher is a movable or portable fire protection apparatus used for putting out small fires. It is generally kept at different fire points in factories, buildings, vehicles and public spaces. The device interferes with the fire triangle made of three elements which are required to create a fire, namely, fuel, oxygen and heat. At present, carbon dioxide (CO₂), dry chemical, foam-based extinguishers are the different types of fire extinguishers available in the market.

The North America fire extinguisher market is currently being driven by various factors. Most of the demand for fire extinguishers is emerging from the construction sector, which includes both residential as well as commercial units. Therefore, rapid development in the construction sector across the region is having a positive impact on the growth of the fire extinguisher market. In addition to this, various transportation owners have started installing fire suppressant equipment in broad vehicles, such as buses, to ensure the safety of passengers. Moreover, numerous regulations and initiatives have been implemented by the government in the region to mandate the provisions of fire protection which is fueling the demand for fire extinguishers in the region.
