Report description:

Market Overview:

The Morocco couscous market size reached US\$ 455.1 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 639.3 Million by 2028, exhibiting a growth rate (CAGR) of 6% during 2023-2028.

Couscous is a traditional North African dish that is made up of crushed and steamed granules of durum wheat semolina. Moreover, couscous is healthy, convenient, easy-to-make, delicious, offers versatility, and comes with health claims such as gluten-free and whole-grain food. In Morocco, the prevalent trend of westernization has led to the introduction of newer and innovative couscous preparation recipes.

In recent times, the rising consumer health consciousness towards high obesity levels have augmented the consumption of couscous, accounting to its low-caloric value and high protein/fiber content. Furthermore, the increasing demand for ready-to-eat food items, coupled with the wide availability of traditional, canned, frozen, microwavable couscous variants across the Moroccan retail channels, has been supporting the market growth. Additionally, the introduction of flavored and organic couscous products caters to the changing tastes and preferences of the Moroccan population.
