This report provides a comprehensive and current market scenario of the US dental & orthodontic adhesives market, including the US dental & orthodontic adhesives market size, anticipated market forecast, relevant market segmentations, and industry trends.

The study considers a detailed scenario of the present dental & orthodontic adhesives market and its market dynamics for 2023?2028 in the US. It covers a detailed overview of several market growth enablers, restraints, and trends. The report offers both the demand and supply aspects of the market. It profiles and examines leading companies and other prominent players operating in the market.

MARKET DEFINITION

Dental & orthodontic adhesives are water-soluble, non-toxic materials that can be applied to gums and dentures to hold them in place. These are available in powder, liquid, and cream forms.

KEY HIGHLIGHTS

- In the US, the dental & orthodontic adhesives market is expected to grow at a CAGR of 5.83% from 2022-2028.
- The demand for dental & orthodontic adhesives market is rising due to multiple factors, including increased prevalence of dental disorders and oral carriers, growth in awareness related to oral health, and the increased adoption of cosmetic dental procedures.
- Under the application type segmentation, the restorative adhesives segment accounted for the highest share of 65.35% and is projected to grow at the highest CAGR of 5.49% during the forecast period. The increased demand for restorative adhesives is due to their wide usage and better features of this material over traditionally used ones.

-□Based on formulation segmentation, the dental adhesive creams segment accounted for the highest share of 49.36% and is projected to grow at the highest CAGR of 6.26% during the forecast period. The increased demand for dental adhesive creams is due to the rise in the number of restorations and the increase in awareness about dental care. In addition, the easy usage of dental adhesive creams also drives the segment's growth.

-□Based on end-user segmentation, the dental clinics segment accounted for the highest share of 60.74% in 2022 and is projected to grow at the highest CAGR of 6.30% during the forecast period. This domination is since dental clinics became viable patient care centers due to their relatively better service time, especially in the US. In addition, a rise in dental health awareness and restorative and prosthetic dental procedures among private dental practitioners also drives the segment's growth.
