Indonesia Generics Market Summary, Competitive Analysis and Forecast to 2027

Summary

Generics in Indonesia industry profile provides top-line qualitative and quantitative summary information including: market size (value 2017-22, and forecast to 2027). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

- For the purposes of this profile, a generic drug is defined as a copy of an ethical (prescription) drug formerly protected by patents that have now expired. Both unbranded generics and branded generics are included in our market scope. However, off-patent drugs that continue to be offered by the original manufacturer under the original name, and which form part of the 'generic-eligible' market, are not included. The market value is evaluated at ex-factory prices.
- The Indonesian generics market had total revenues of \$1.5 billion in 2022, representing a compound annual growth rate (CAGR) of 10.2% between 2017 and 2022.
- Market consumption volume increased with a CAGR of 1.1% between 2017 and 2022, to reach a total of 50.7% in 2022.
- The consumption of generic medication is expanding due to its lower cost than patented original medications, giving them an edge in volume-based procurement settings where there is intense price rivalry.
