Report description:

Wound care is set to see sales rise in current value terms in 2023, even as volumes fall. The increase in value sales is being driven primarily by rising unit prices in the context of a generally high rate of inflation. While volume sales are set to remain well below the level seen prior to the outbreak of COVID-19, value sales are set to exceed the level seen in 2019 during 2023.

Euromonitor International's Wound Care in Finland report offers a comprehensive guide to the size and shape of the market at a national level.
