Report description:

Cheese in Egypt is witnessing small growth in current retail volume, and a huge increase in current retail value sales in 2023 due to the increases in price. The sector was still in recovery following the impact of COVID-19, when the war in Ukraine further impacted prices, with most cheese types in the country being imported. In addition, the devaluation of the Egyptian pound and rising global inflation has further raised prices. Local production is suffering as a result, with certain elements im...

Euromonitor International's Cheese in Egypt report offers in-depth knowledge of the market at a national level, providing local insight and understanding unavailable elsewhere. In addition to the latest retail sales data 2018-2022, it identifies the leading companies, brands and retail outlets, and assesses the key trends and demographic shifts behind consumer demand and sales growth.
