### **Report description:**

Drinking milk is expected to register healthy current value and volume growth in 2023. A significant number of newly-arrived migrants from Ukraine, escaping from the war, is also expected to increase volume sales. However, inflation is expected to still be an issue, though its growth is expected to ease. As a result, consumers are expected to be price sensitive and prioritise value for money. Fresh milk continues to be the largest product, both in terms of value and volume sales, with fat-free f...
