Report description:

In 2023, weight management and wellbeing is set to see continued retail volume and current value growth. The positive performance of the category is expected to be triggered by several factors. For instance, based on the latest data released by the Ministry of Health in Indonesia, 14% of Indonesian adults are overweight, and 28% are obese. There is also a higher chance of teenagers aged 13-18 being overweight. Women who live in urban areas also tend to have a higher chance of being obese compare...
