Report description:

Wound care is expected to positive current value and volume growth in 2023. The full opening of society, post pandemic, supports volume sales, as people are more active, and as a consequence there are more small injuries. Continuing population growth also supports increased volume sales. In addition, geopolitical tensions in the region have led to a significant increase in the number of immigrants from Ukraine, Russia and Belarus, and this is expected to also contribute to volume growth.
