Report description:

In 2023, analgesics is set to see strong growth supported by rising prices in the context of generally high rates of inflation. After strong growth in 2020 due to stockpiling and decline in 2021, the category returned to growth in 2022 and has followed in the same vein in 2023. Consumers got used to consuming analgesics during the pandemic, when these products were used to treat symptoms of COVID-19, so the category has established stable demand.
