Report description:

Global Cryopreservation for In-Vitro Fertilization (IVF) Market Report and Forecast 2024-2032

Global Cryopreservation for In-Vitro Fertilization (IVF) Market Outlook

The global cryopreservation for in-vitro fertilization (IVF) is expected to grow at a CAGR of 10.6% during the forecast period of 2024-2032.

Cryopreservation for In-Vitro Fertilization (IVF): Introduction

Cryopreservation for in-vitro fertilization (IVF) is a critical component of modern assisted reproductive technology (ART) that allows the freezing and preservation of reproductive materials such as eggs, sperm, and embryos for future use in fertility treatments. This technology has revolutionized the field of reproductive medicine, offering new possibilities to individuals and couples facing fertility challenges. cryopreservation for IVF is a transformative technology that has expanded the possibilities for fertility preservation, assisted reproduction, and family building. It has become an integral part of modern reproductive medicine, offering hope and options to individuals and couples on their journey to parenthood. The availability and affordability of cryopreservation services have improved, making fertility preservation and IVF more accessible to a broader range of individuals and couples.

Key Trends in the Global Cryopreservation for In-Vitro Fertilization (IVF) Market

The cryopreservation for in-vitro fertilization (IVF) market has been experiencing significant growth and evolution in recent years. Several key trends are some key trends shaping the market:

- Fertility Preservation for Women: An increasing number of women are choosing to freeze their eggs for fertility preservation. This trend is driven by delayed childbearing, career considerations, and advancements in egg freezing technology.
- Single Embryo Transfer (SET): To reduce the risk of multiple pregnancies and associated complications, IVF clinics are moving towards SET, where a single embryo is transferred, and the remaining high-quality embryos are cryopreserved for future use.
- Globalization of Cryopreservation Services: Cryopreservation banks and IVF clinics are expanding their services internationally.

www.scott's-international.com

This trend allows patients to access donor gametes and reproductive materials from around the world, increasing their options for assisted reproduction.

-□ Donor Gametes and Embryo Adoption: The availability of cryopreserved donor sperm, eggs, and embryos is increasing. This has facilitated assisted reproduction for individuals and couples who require donor materials, contributing to a growing global market for these services.

Global Cryopreservation for In-Vitro Fertilization (IVF) Market Segmentations

The market can be categorized type, application, end user, and region.

Market Breakup by Type

- Cryopreservation Media
- Cryopreservation Storage Devices
- Consumables
- Accessories
- Cryo-shipping
- Others

Market Breakup by Applications

- Oocyte Cryopreservation
- Sperm Cryopreservation
- Embryo Cryopreservation
- Others

Market Breakup Disease by End User

- Biobanks
- IVF Centres
- Fertility Clinics
- Research and Academic Institutes
- Cryo-shipping/ Couriers

Market Breakup by Region

- North America
- Europe
- Asia Pacific
- Latin America
- Middle East and Africa

□

Global Cryopreservation for In-Vitro Fertilization (IVF) Market Overview

The global cryopreservation for in-vitro fertilization (IVF) market is an integral part of the assisted reproductive technology (ART) industry. Cryopreservation techniques have transformed the field of reproductive medicine by allowing the freezing and storage of reproductive materials, such as eggs, sperm, and embryos, for future use in fertility treatments. The global cryopreservation for IVF market has experienced significant growth and is projected to continue expanding in the coming years.

Factors contributing to market growth include increasing infertility rates, delayed childbearing, advancements in cryopreservation

technology, and the growing demand for assisted reproductive treatments. the global cryopreservation for IVF market is vital in assisting individuals and couples in their journey to parenthood. The adoption of cryopreservation technology, along with advancements in IVF treatments, has expanded the possibilities for fertility preservation and family building. As the demand for assisted reproductive technologies continues to grow, the cryopreservation for IVF market is expected to see further development and innovation in the years to come.

Key Players in the Global Cryopreservation for In-Vitro Fertilization (IVF) Market

The key features of the market report include patent analysis, grants analysis, clinical trials analysis, funding and investment analysis, partnerships, and collaborations analysis by the leading key players. The major companies in global cryopreservation for in-vitro fertilization (IVF) market are as follows:

- Cryotech
- Cook Medical LLC
- Fujifilm Irvine Scientific
- Thermo Fisher Scientific Inc
- Coldstash Inc.
- Vitromed GmbH
- Corning Incorporated
- Cryogatt Systems Ltd
- Brook Life Sciences
- Cryo Solutions B.V.

We at Expert Market Research always strive to provide you with the latest information. The numbers in the article are only indicative and may be different from the actual report.

Table of Contents:

- 1Preface
- 1.1Objectives of the Study
- 1.2Key Assumptions
- 1.3Report Coverage - Key Segmentation and Scope
- 1.4Research Methodology
- 2Executive Summary
- 3Global Cryopreservation for in-vitro fertilization (IVF) market Overview
- 3.1Global Cryopreservation for in-vitro fertilization (IVF) market Historical Value (2017-2023)
- 3.2Global Cryopreservation for in-vitro fertilization (IVF) market Forecast Value (2024-2032)
- 4Global Cryopreservation for in-vitro fertilization (IVF) market Landscape
- 4.1Global Cryopreservation for in-vitro fertilization (IVF): Developers Landscape
- 4.1.1Analysis by Year of Establishment
- 4.1.2Analysis by Company Size
- 4.1.3Analysis by Region
- 4.2Global Cryopreservation for in-vitro fertilization (IVF): Product Landscape
- 4.2.1Analysis by End User
- 4.2.2Analysis by Type
- 4.2.3Analysis by Applications
- 5Global Cryopreservation for in-vitro fertilization (IVF) market Dynamics
- 5.1Market Drivers and Constraints
- 5.2SWOT Analysis
- 5.3Porter's Five Forces Model
- 5.4Key Demand Indicators

- 5.5Key Price Indicators
- 5.6Industry Events, Initiatives, and Trends
- 5.7Value Chain Analysis
- 6Global Cryopreservation for in-vitro fertilization (IVF) market Segmentation
 - 6.1Global Cryopreservation for in-vitro fertilization (IVF) market by Type
 - 6.1.1Market Overview
 - 6.1.2Cryopreservation Media
 - 6.1.3Cryopreservation Storage Devices
 - 6.1.4Consumables
 - 6.1.5Accessories
 - 6.1.6Cryo-shipping
 - 6.1.7Others
 - 6.2Global Cryopreservation for in-vitro fertilization (IVF) market by Applications
 - 6.2.1Market Overview
 - 6.2.2Oocyte Cryopreservation
 - 6.2.3Sperm Cryopreservation
 - 6.2.4Embryo Cryopreservation
 - 6.2.5Others
 - 6.3Global Cryopreservation for in-vitro fertilization (IVF) market by End User
 - 6.3.1Market Overview
 - 6.3.2Biobanks
 - 6.3.3IVF
 - 6.3.4Fertility Clinics
 - 6.3.5Research and Academic Institutes
 - 6.3.6Cryo-shipping/ Couriers
 - 6.4Global Cryopreservation for in-vitro fertilization (IVF) market by Region
 - 6.4.1Market Overview
 - 6.4.2North America
 - 6.4.3Europe
 - 6.4.4Asia Pacific
 - 6.4.5Latin America
 - 6.4.6Middle East and Africa
- 7North America Cryopreservation for in-vitro fertilization (IVF) market
 - 7.1Market Share by Country
 - 7.2United States of America
 - 7.3Canada
- 8Europe Cryopreservation for in-vitro fertilization (IVF) market
 - 8.1Market Share by Country
 - 8.2United Kingdom
 - 8.3Germany
 - 8.4France
 - 8.5Italy
 - 8.6Others
- 9Asia Pacific Cryopreservation for in-vitro fertilization (IVF) market
 - 9.1Market Share by Country
 - 9.2China
 - 9.3Japan
