Report description:

Market Overview:

The global edtech market size reached US\$ 194.6 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 452.4 Billion by 2028, exhibiting a growth rate (CAGR) of 14.3% during 2023-2028.

Education technology (EdTech) refers to a technology that is used to deliver education on a virtual level. EdTech consists of hardware and software that are used to deliver education on a virtual level for the benefit of students and to improve their education outcomes. The use of technology for learning and teaching assists students in overcoming hurdles to obtaining a comprehensive education. Digital content is easier to generate than printed content, which has a higher production cost, and therefore eBooks are becoming increasingly popular among learners due to their cost efficiency, flexibility and portability. Additionally, listeners with disabilities can benefit from audio formats of educational content to improve their vocabulary and learn to read interpretively.

Edtech Market Trends:

The market is majorly driven by the paradigm shift in the adoption of touchscreen displays from projector-based displays to provide more student engagement. This can be attributed to the rapid digitization in the education sector. In addition to this, the rapid utilization of artificial intelligence (AI) and machine learning (ML) technologies for creating personalized eLearning experiences is creating a positive market outlook. Moreover, the expanding penetration of high-speed internet, along with the increasing sales of smart devices, is providing an impetus to the market. Increasing investments in online learning and distance learning programs due to their flexibility and real-time feedback are also impacting the market positively. The market is further propelled by the outbreak of COVID-19 leading to the rapid closure of educational institutions and the mandatory implementation of social distancing norms resulting in widespread digital learning via digital platforms. Some of the other factors that are contributing to the market include rapid urbanization, inflating disposable income levels, the emergence of 5G, and extensive
