Report description:

Prague and Brno are the Czech Republic's most economically vibrant cities. Moreover, Brno holds the highest potential for future economic growth. However, challenges will persist for the country's cities - in the near term, global economic uncertainties, geopolitical tensions, inflationary pressures and tightening financial conditions, and in the longer run, the consequences of ageing populations.

Euromonitor International's City Review reports analyse key trends and developments in 126 world's major cities. They provide localised city information in terms of economy, consumer lifestyles, housing and transport and city environment and offer valuable insights for strategic planning.

Data coverage: market sizes (historic and forecasts), company shares, brand shares and distribution data.
