Report description:

Spain Acetone market demand stood at 357.4 Thousand Tonnes in 2020 and is forecast to reach 500.79 Thousand Tonnes by 2030, growing at a healthy CAGR of 3.02% until 2030. Demand for Acetone in Spain is primarily driven by its remarkable consumption as a quality solvent in pharmaceuticals and cosmetics owing to its ideal properties and affordable cost. In addition, the consistent spike in demand for its highly desired derivatives like Bisphenol A and Methyl Methacrylate across various end-use industries is perceived to contribute well to the growth of the Spanish Acetone market.

Due to the outbreak of COVID-19 in 2020, the world economy was disrupted. The market was affected drastically, and production and manufacturing units were shut down. Furthermore, the major market players intentionally halted the production keeping their employee's health and wellness in mind. With imposed new regulations of the COVID-19 and proper precautions, the market is anticipated to regain its growth in the years to come. The pandemic is slowly being subsided and the effects are tried to be overcome by various methods. Once the market regains the full function of its production unit, the market is bound to show robust growth in the forecast period. The major factors driving the acetone market are growing usage in the production of personal care and household products, the growing electronics industry in the country, and the increasing demand for polycarbonate products.
