Report description:

Mexico Phenol market demand stood at 55.2 Thousand Tonnes in 2020 and is forecast to reach 78.7 Thousand Tonnes by 2030, growing at a healthy CAGR of 3.48% until 2030. The country's Phenol industry is likely to gain momentum in tandem with rising investments across the residential and non-residential complexes wherein Phenolic Resins find the key usage. Moreover, the growing demand for Polycarbonates from the automotive and electronic goods sector is further expected to boost the market growth. The outbreak of COVID-19 in 2020 disrupted the economy. The market growth was affected drastically, and production units shut down. Furthermore, the major market players intentionally halted the production keeping their employees' health and wellness in mind. With imposed new regulations of the COVID-19 and proper precautions, the market is anticipated to regain its growth in the years to come. Once the market regains the full function of its production unit, the market is bound to show robust growth in the forecast period.
