Report description:

Indonesia Ethanol Derivative demand stood at 76.29 Thousand Tonnes in 2020 and is forecast to reach 128.17 Thousand Tonnes by 2030, growing at a healthy CAGR of 5.36% until 2030. An increase in demand for quality solvents for the Paint & Coating industry and Cosmetic Industry is likely to surge the demand for Ethanol derivatives with a healthy CAGR. The demand for Ethanol derivatives in Indonesia is likely to grow appreciably in the forecast period driven by strong government support for the downstream application industry owing to its low production cost and eco-friendly attributes. Due to the outbreak of COVID-19 in 2020, the world economy was disrupted. The market was affected drastically, and production and manufacturing units were shut down. Furthermore, the major market players intentionally halted the production keeping their employee's health and wellness in mind. With imposed new regulations of the COVID-19 and proper precautions, the market is anticipated to regain its growth in the years to come. The pandemic is slowly being subsided and the effects are tried to be overcome by various methods. Once the market regains the full function of its production unit, the market is bound to show robust growth in the forecast period.
