Report description:

Australia plastic recycling market stood at 2.96 Million Tonnes in 2020 and is forecast to reach 3.99 Million Tonnes by 2030, growing at a healthy CAGR of 2.91% until 2030. Continuous advancements in recycling technologies coupled with the growing awareness regarding recycling are the key factors responsible for bolstering the growth of the plastic recycling market in the country. Moreover, a recent ban on domestic waste product exports has put the responsibility back on Australians regarding plastic recycling, which is anticipated to drive market growth in the coming years. Australia National Waste Policy was introduced in 2009 and updated in 2018 has five basic principles such as improve resource recovery, avoid waste, increase the use of recycled material, manage material flow, and enhance information flow to support innovation. Such policies also favor the use of recycled plastic in the country, which is likely to boost the plastic recycling market in the region. The COVID-19 outbreak had a devastating impact on the economy but increased the consumption of plastics for packaging and manufacturing essential items. However, the limited mobility of goods and personnel created a huge lack of labour forece, responsible for the collection of plastic waste around the country, which affected the Australia Plastic Recycling market negatively.

Under this subscription, you would be able to access Australia Plastic Recycling market demand and supply analysis on a cloud-based platform for one year. The data is updated on a near real-time basis to add any new movement in the industry including, but not limited to new plant announcements, plant shutdowns, temporary disruptions in demand or supply, news and deals, and much more specific to Plastic Recycling.

Years Considered for Analysis: Historical Years: 2015 - 2019

Base Year: 2020 Estimated Year: 2021

Forecast Period: 2022 - 2030

Deliverables

- Installed Capacity By Company-Installed capacity within the country along with the individual capacity of leading players
- Installed Capacity By Location-Installed capacity at several locations across the country
- Production By Company-Actual production done by different companies
- Operating Efficiency By Company-Operating efficiency at which different companies are operating their plants
- Demand By End Use-Demand/Sale of Plastic Recycling in different end-user industries across the country
- Demand By Sales Channel-Demand/Sale of Plastic Recycling by different sales channels across the country
- Demand By Region-Demand/Sale of Plastic Recycling in different regions of the country
- Country Wise Exports-Exports of Plastic Recycling by Different Countries
- Country Wise Imports-Imports of Plastic Recycling by Different Countries
- Demand & Supply Gap-Demand & Supply Gap at country level
- Market Share of Leading Players-Revenue shares of leading players in the country
- News & Deals-Historical & Current News & Deals in the Plastic Recycling market

To extract data for the Australia Plastic Recycling market, the ChemAnalyst team conducts primary research surveys with Plastic Recycling manufacturers, suppliers, distributors, wholesalers, and customers, followed by exhaustive secondary research to cross-validate the information being collected through primary research surveys.

Table of Contents:

- 1. Australia Plastic Recycling Market Outlook, 2015-2030
- 1.1. ☐ Capacity By Company
- 1.2. Capacity By Location
- 1.5. Production By Company
- 1.6. □Operating Efficiency By Company
- 1.7. Country-Wise Import
- 1.8. Country-Wise Export
- 1.9. Demand-Supply Gap
- 2. Australia Plastic Recycling Demand Outlook, 2015-2030
- 2.1. □By End Use
- 2.2. □By Application □
- 2.3. By Sales Channel (Direct/Institutional Sales, Retail Sales, Other Channel Sales)
- 2.4. By Region
- 2.5. By Company Share of Leading Players
- 3. News & Deals
