Report description:

Mexico plastic recycling market stood at 4.04 Million Tonnes in 2020 and is forecast to reach 6.57 Million Tonnes by 2030, growing at a healthy CAGR of 5.23% until 2030. Owing to the fact that Mexico is a major consumer of food and beverage products, there is a growing need for recycling Polyethylene Terephthalate (PET), widely used to make beverage bottles and food containers. This is likely to increase the demand for the plastic recycling market in the region. Major beverages companies such as Coca-Cola have collaborated with Ecology and Corporate Commitment (ECOCE) to secure domestic supply for PET in Mexico via recycling. Mexico is one of the leading countries with a higher recycling rate of PET resin for packaging in the world, which is anticipated to increase during the forecast period as the demand for packaging in the food and beverage industry is increasing. Several initiatives launched in Mexico to curtail the use of plastics along with ease in government policies in recycling facilities have encouraged many industries to adopt green and sustainable solutions, which is further anticipated to increase the demand for the plastic recycling market in Mexico.

The outbreak of COVID-19 in 2020 disrupted the regional economy with repeated lockdowns and shutting of factors, which affected the plastic recycling market growth drastically. While plastic consumption skyrocketed during 2020 due to its diverse application in healthcare, pharmaceutical, food & beverages, etc., inappropriate disposal of plastic waste due to lack of labor force affected the Mexico Plastic Recycling market negatively.
