Report description:

The UAE Methanol market demand stood at 2500 Thousand Tonnes in 2020 and is forecast to reach 3805.79 Thousand Tonnes by 2030, growing at a healthy CAGR of 3.80% until 2030. Since Methanol offers a low evaporation rate and low radiant heat, its consumption in UAE is increasing across various industries as a safer process fuel amidst rising environmental concerns. As Methanol is easily biodegradable, it is favored as an ideal replacement of crude derivatives in industries like chemical and petrochemicals, paints and coatings, automotive, construction, etc. Furthermore, cost-effective, and versatile manufacturing routes of Methanol provide it an upper hand over other crude alternatives and thus embarks high growth prospects in the forecast period.

COVID-19 pandemic had a severe impact on the market, in general, and disrupted the country's economy. The manufacturing units were closed for a significant amount of time and disturbed the distribution channels. The rising threat of mass death convinced the government to maintain lockdown methods keeping the markets at a halt. The government is slowly controlling the consequences, and steadily market is regaining its composure.
