Report description:

Brazil's LPG industry stood at 7.7 Million Tonnes in 2020 and is forecast to reach 11.86 Million Tonnes by 2030, growing at a healthy CAGR of 4.31% until 2030. The majority of LPG demand in Brazil is being strongly met through imports from the US and other Latin American states. The country's roughly two-thirds of the LPG produced is obtained from refineries and the remaining from natural gas processing facilities. Residential and commercial users are the key demand driving sectors of the country's overall LPG demand as of 2019. Due to the onset of the COVID-19 pandemic, the demand for LPG in residential spaces witnessed a boost owing to the lockdown restrictions imposed by the leading authorities. However, disruption in the supply chain and the temporary closure of manufacturing units hindered the market growth during the COVID-19 period.

Under this subscription, you would be able to access Brazil LPG market demand and supply analysis on a cloud-based platform for one year. The data is updated on a near real-time basis to add any new movement in the industry including but not limited to new plant announcements, plant shutdowns, temporary disruptions in demand or supply, news and deals, and much more specific to LPG.
