Report description:

Colombia IPA market demand stood at 18.59 Thousand Tonnes in 2020 and is forecast to reach 28.43 Thousand Tonnes by 2030, growing at a healthy CAGR of 4.15% until 2030 owing to growing consumption from its pharmaceuticals and disinfectants manufacturing units. IPA finds usage in foods, adhesives, paints, and coatings, as a cleaning agent for electronic devices and is also used as a feedstock for manufacturing several chemical intermediates. Strengthening downstream manufacturing will act as a key driver for the country's IPA market in the forecast period. Since the outbreak of COVID-19, the demand for hand sanitizers witnessed a dramatic growth as it protects the skin from getting infected with the harmful coronavirus. To contain the spread of novel coronavirus, the sale of hand sanitizers accelerated and the sanitizers use Iso Propyl Alcohol as the main ingredient which led to high demand in this period.
