World economy was disrupted due to the outbreak of COVID-19 in 2020. The market was affected drastically, and production and manufacturing units were shut down. Furthermore, the major market players intentionally halted the production keeping their employee's health and wellness in mind. Although, the market experienced a surge in demand for isopropyl alcohol due to its use in the production of end products like hand sanitizers, disinfectants, etc. With imposed new regulations of the COVID-19 and proper precautions, the market is anticipated to regain its growth in the years to come.
