**Report description:**

The IPA market in India stood at 218.21 Thousand Tonnes in FY2021 and is forecast to reach 392.15 Thousand Tonnes by FY2030, growing at a healthy CAGR of 6.73% until FY2030 owing to its growing consumption as a solvent in the country's aggressively growing pharmaceuticals and chemicals industry. With the increase in per capita income and rising urbanization, the demand for IPA is set to grow enormously in the coming years. Deepak Fertilizers, the country's sole IPA manufacturer has added new capacities sensing a strong surge in its demand for IPA and its derivatives from the downstream pharmaceuticals and consumer sectors. The outbreak of COVID-19 in FY2020 disrupted the country's economy. The market growth was affected drastically, and production units shut down. Furthermore, the major market players intentionally halted the production keeping their employees' health and wellness in mind. With imposed new regulations of the COVID-19 and proper precautions, the market is anticipated to regain its growth in the years to come. Once the market regains the full function of its production unit, the market is bound to show robust growth in the forecast period. Potential investment in the market is expecting steady growth in the market in the forecast period, until 2030. Also, the presence of a single market player in the country is a potential scope where new market players may enter the market and benefit from the easier market establishment.
